SUPERVISED VISITATION EXPECTATIONS AND GUIDELINES

ROLE OF SUPERVISOR:

The supervisor’s role is to provide safety and security to the children while they are visiting with a non-custodial parent. They will be in the room/community with the supervised parent at all times and in close enough proximity to hear and see all activity. They will not engage in any discussion regarding the reason for supervision or give any guidance or suggestions regarding your situation. The supervisor will end a visit if they feel the child is in any POTENTIAL emotional or physical danger, or if the interaction is becoming counterproductive – This may be if a child is becoming uncomfortable or upset. **This may not be due to inappropriateness of the parent.** The supervisor is there to protect the child first and parent second.
